SUMMARY

Experienced GIS professional with over 13 years of progressive experience designing, managing, and delivering geospatial solutions within the oil and energy industry. Skilled in enterprise GIS administration, spatial data management, cartography, spatial analysis, GIS operations, and supporting engineering and geoscience teams with reliable geospatial products and services.

Currently serving as Manager – GIS & Data Systems at Vickery Energy, leading enterprise GIS initiatives, managing spatial data systems, and supporting operational decision-making through advanced geospatial solutions.

Throughout his career, Devin has worked extensively with ArcGIS technologies, GIS databases, geospatial workflows, and mapping systems. He has a strong ability to translate complex operational requirements into effective GIS solutions while improving data quality, workflow efficiency, and business outcomes.

EDUCATION

Indiana University of Pennsylvania

Bachelor of Arts – Environmental Geography and GIS/Cartography

2006 – 2010

EXPERIENCE

Manager – GIS & Data Systems

Vickery Energy

September 2024 – Present

Pittsburgh, Pennsylvania, United States

Lead GIS strategy and oversee enterprise geospatial systems supporting energy operations and business decision-making.

- Manage enterprise GIS systems and spatial data infrastructure.
- Develop and maintain GIS workflows supporting operational teams.
- Lead geospatial data management initiatives.
- Support engineering and business teams through spatial analysis and mapping solutions.
- Improve GIS processes, data quality, and system efficiency.
- Evaluate and implement modern GIS technologies.

GIS Administrator

Gateway Engineers

December 2023 – September 2024

Pittsburgh, Pennsylvania, United States

Managed GIS systems and provided geospatial support for engineering and infrastructure projects.

- Administered GIS environments and spatial datasets.
- Supported engineering teams with mapping products and analysis.
- Maintained GIS databases and workflows.
- Produced accurate cartographic outputs.
- Improved accessibility and reliability of geospatial information.

GIS Manager

Tug Hill Operating

May 2022 – August 2023

Canonsburg, Pennsylvania, United States

Managed GIS operations supporting oil and gas activities.

- Led GIS projects and operational workflows.
- Managed spatial data resources.
- Coordinated GIS support for engineering and operational teams.
- Developed improved mapping and analysis processes.
- Ensured accuracy and consistency of geospatial information.

GIS Analyst

Tug Hill Operating

May 2017 – May 2022
Canonsburg, Pennsylvania, United States

Provided GIS analysis and mapping support for energy operations.

- Performed spatial analysis and geoprocessing.
- Created cartographic products and maps.
- Managed GIS datasets.
- Supported engineering and operational decision-making.
- Developed GIS solutions for business needs.

GIS Technician

Noble Energy

April 2012 – May 2017
Canonsburg, Pennsylvania, United States

Supported Geoscience and Engineering personnel with a wide variety of spatial products and services.

- Produced basic and advanced cartographic products.
- Performed spatial analysis and process modeling.
- Supported engineering and geoscience workflows.
- Created GIS products to support petroleum operations.
- Assisted teams with geospatial problem-solving.

GIS Specialist

Western Land Services, Inc.

May 2011 – April 2012
Canonsburg, Pennsylvania, United States

Provided GIS services supporting land and energy projects.

- Created and maintained GIS datasets.
- Produced mapping products.
- Supported spatial information management.
- Assisted with geospatial analysis and reporting.

TECHNICAL SKILLS

Enterprise GIS Management

GIS Administration

ArcGIS Pro

ArcMap

Spatial Analysis

Cartography

Geospatial Data Management

GIS Database Management

GIS Workflow Development

Oil & Gas Mapping

Pipeline Mapping

Engineering GIS Support

Geoscience Support

Spatial Data Visualization

Data Quality Management

GIS Automation

QGIS

GDAL

GeoJSON

Python for GIS

Technical Documentation

Team Leadership

Process Improvement

Enterprise GIS
Geoprocessing
GIS Data Management
Spatial Database Management
GIS Workflow Optimization
Geospatial Visualization
Python GIS Automation
Spatial Data Processing

INDUSTRY EXPERIENCE

Oil & Energy Petroleum Operations Engineering Support Geoscience Infrastructure Mapping Land Services

PROFESSIONAL ACHIEVEMENTS

Successfully supported enterprise GIS operations across multiple energy organizations. Delivered GIS solutions for engineering, geoscience, and operational teams. Developed expertise in spatial analysis, cartography, and geospatial data management. Advanced from GIS Specialist and Technician roles into GIS leadership positions. Built extensive experience applying GIS technologies to real-world energy challenges.

PROFESSIONAL REFERENCE

Robert Graham Jr., GISP GIS Leader | ArcGIS Pro | Python | Geospatial Automation Expert

Recommendation: "Devin does great work and is open for new challenges. He has been a great asset to the geospatial community at Noble Energy. Devin is excited about learning new methods to use geospatial technology to solve the issue of the day in the petroleum industry. He will work hard to accomplish the goals and tasks of the job with integrity and innovation."

PROFESSIONAL PROFILE

Devin Creighton is an experienced GIS leader specializing in enterprise geospatial systems, spatial data management, and GIS solutions for the energy sector. With more than a decade of experience, he combines technical GIS expertise with leadership capabilities to deliver reliable geospatial solutions that improve operational efficiency and decision-making.
